

ABOUT US

Industrial Mechanical Contractors, Inc. has been servicing the needs of the Tri-state area (PA, NJ, & DE) for the past four decades! During that time we have placed an emphasis on customer service and client satisfaction.

In fact, the foundation of our business is, and will continue to be...

"a commitment to exceeding your expectations in all aspects of our products and services."

To maintain this commitment of quality workmanship we employ journeymen refrigeration and air conditioning technicians, who have completed a rigorous five-year HVAC/R training program prior to their many years of field experience. They have proven their ability to perform mechanical work in Installing / Servicing / Repairing HVAC equipment, ranging from small commercial to large industrial applications.

Energy Management

Industrial mechanical Contractor's is helping light commercial, educational, retail, office and multi-family customers implement cost-effective, high performance technology solutions for energy management.

Since HVAC costs typically account for more than 30% of a building's electricity costs, its critical to control in-room energy consumption as it can significantly impact a property's bottom line.
